## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 3\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Sesha is developing a weather monitoring system for a region with multiple weather stations. Each weather station collects temperature data hourly and stores it in a 2D array.

Write a program that can add the temperature data from two different weather stations to create a combined temperature record for the region.

##### ***Input Format***

The first line of input consists of two space-separated integers N and M, representing the number of rows and columns of the matrices, respectively.

The next N lines consist of M space-separated integers, representing the values of the first matrix.

The following N lines consist of M space-separated integers, representing the values of the second matrix.

### **Output Format**

The output prints the addition of the two matrices in N rows and M columns, representing the combined temperature record.

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: 3 3

1 2 3

4 5 6

7 8 9

1 1 1

2 2 2

3 3 3

Output: 2 3 4

6 7 8

10 11 12

### **Answer**

```
// You are using Java
import java.util.Scanner;
class Main{
    public static void main(String[] args){
        Scanner scan=new Scanner(System.in);
        int row=scan.nextInt();
        int col=scan.nextInt();
        int[][] arr1=new int[row][col];
        int[][] arr2=new int[row][col];
        for(int i=0;i<row;i++){
            for(int j=0;j<col;j++){
                arr1[i][j]=scan.nextInt();
            }
        }
        for(int i=0;i<row;i++){
            for(int j=0;j<col;j++){
                arr2[i][j]=scan.nextInt();
```

```
    }  
  }  
  int[][] ans=new int[row][col];  
  for(int i=0;i<row;i++){  
    for(int j=0;j<col;j++){  
      ans[i][j]=arr1[i][j]+arr2[i][j];  
    }  
  }  
  for(int i=0;i<row;i++){  
    for(int j=0;j<col;j++){  
      System.out.print(ans[i][j]+" ");  
    }  
    System.out.println();  
  }  
}
```

**Status :** Correct

**Marks :** 10/10
